Senior IT Officer	Present
Education Organizations	

SUMMARY

I want to establish my career in the field of IT. As an engineer, I aspire to contribute to my country and society through the field I have chosen.

PROJECTS

Distance education (Learning Together)

This project was built on Asp.net Platform with C# as programming language. Through this project I and my team member believed to upgrade the conventional paper-based learning system into a modern Internet based learning methodology.
The project was complete on 6 months period and through this project I myself gained expertise on different technical works. This project was more than academic fulfillment, it was means of learning and gaining more and more knowledge and developing skills towards software development.
